Affirmative Action

During the development of this course of study, particular attention was paid to the elimination or exclusion of any materials which might discriminate on the basis of race, color, national origin, ancestry, age, sex, affectional or sexual orientation, gender identity or expression, marital status, familial status, genetic information, mental or physical disabilities, or in educational opportunities. Every effort has been made to uphold both the letter and spirit of Affirmative Action mandates as applied to the content, the texts and the instruction inherent in this course.

Our Language Arts Philosophy

We believe in a balanced approach to the teaching of language arts. We develop readers and writers to become thinkers and to develop strategies to become global citizens. We believe that readers need access to books that they find fascinating, time to read, and expert instruction (Richard Allington 2011). We believe that writers need time, choice, and feedback to be successful. The curriculum includes explicit instruction in

language arts content through read alouds and vocabulary instruction that build background knowledge and schema. The units are built using research based strategies that promote literacy behaviors and skills that contribute to strategic thinking, reading, and writing. We have based the creation of this curriculum on the components of Scarborough’s Rope, pictured below. Students need both strong language comprehension paired with word recognition to develop skilled reading (NJ Dyslexia Handbook, p. 20).

Reading Workshop

What is Reading Workshop?

Throughout the year, students will go on a literacy journey learning important skills that contribute to their lives as readers and writers in an ever-changing world. Within a workshop model, teachers implement standards-based minilessons to support whole class goals, followed by individualized small group work, conferences, and assessments that allow for a gradual release of responsibility and differentiated support and challenge for each student’s individual learning needs. Ultimately, the workshop will close with a quick culminating group discussion that reviews the teaching point of the lesson while providing an opportunity for students to share their learning and process.

Minilesson

Each reading workshop lesson begins with explicit instruction in a minilesson. During each minilesson, the teacher introduces a specific concept, also known as the teaching point. Most often, the teaching point focuses on reading skill and strategy. The teacher will explicitly model or demonstrate the skill for the students. Skills are explicitly modeled during minilessons. The minilesson has four parts: the connection, the teach (demonstration), the active engagement and the link. The teacher chooses a skill and strategy that

the class needs based on classroom assessments. During the connection portion of the lesson, the teacher connects prior learning to the current skill. The teacher announces the teaching point: the skill and strategy being taught. In this approach, the teacher shows students how to accomplish the skill by modeling the strategy in a book with which the students are familiar. The teacher also uses a think-aloud. This method shows students how to think about the text and then allows them to work this out in their own books or a shared text during the active engagement portion of the minilesson. During the link portion of the minilesson, the teacher reminds students about the strategies they can use while they are reading.

Reading Aloud

At Oradell Public School, we value the importance of reading aloud as a time for teachers to model reading with expression, fluency, intonation, and good pacing. Instructional read-alouds promote strategic reading, where students must draw upon their full toolbox of reading knowledge. Most importantly, read-aloud time should promote the joy of reading, thinking, sharing, and learning. The read-alouds in our curriculum are carefully chosen in order to expose students to topics that will develop their knowledge more deeply. These mentor texts find their way into many lessons as the year unfolds and serve as a model for student self-discovery within their own texts.

Interactive Read-Aloud

An interactive read-aloud consists of a series of purposeful activities that engage the class in the book and the strategies that surround it. The following list contains the many parts of an interactive read-aloud:

- Previewing the book
- Scaffolding on prior knowledge
- Modeling vocabulary development
- Teaching reading fluency
- Emphasizing elements of the story
- Asking purposeful questions
- Using think-alouds to assist comprehension
- Summarizing the story to bring closure

Texts used during the interactive read-aloud should be chosen from a wide variety of genres. They should tap into the readers' interests and be full of rich vocabulary.

Shared Reading

Shared Reading is an interactive reading experience that occurs when students join in or share the reading of a book or other text while guided and supported by a teacher. The teacher explicitly models the skills of proficient readers, including reading with fluency and expression

Independent Reading and Book Clubs

Research suggests that a high volume of reading improves reading comprehension. Furthermore, research suggests that students comprehend better when they have an opportunity to discuss their reading content and process. Specific class time is reserved for independent reading, partner reading, guided reading and/or book club reading followed by occasions to talk about texts in student partnerships, small groups, and whole group settings.

Through book clubs, readers will raise the level of conversation about literature. Students will recognize that readers have different viewpoints, and they will defend their claims with reasons and evidence. Students will use everything they know about characters to dig deeper and develop the theme and its complexity.

Students will begin to write and think analytically as they interpret literature within their book clubs to link ideas and build larger theories about texts.

Accountable talk is a strategy that supports students' academic language development through discussion by giving students key phrases they can use when learning skills such as explaining, agreeing, disagreeing, and justifying.

Teachers conduct the Dynamic Indicators of Basic Early Literacy Skills (DIBELS) in grades K-5 three times a year to gather benchmark data. Teachers use this data to develop targeted small group and individual instruction. In addition, grades 2-6 teachers will use a homegrown reading assessment to gather more information about the student as a reader to best support continued growth on their trajectory of reading.

Reading Conferences

In a reading conference, teachers check-in with individual students (or small groups of students with a specific and similar learning need) on their reading interests and progress. After listening to a student read a portion of a text aloud or asking specific teacher-driven questions, teachers will work to:

1. Compliment the student(s).
2. Provide an explicit teaching point.
3. Coach the student as he/she works to apply the skill/strategy.

Teachers take anecdotal notes on conferences as formative assessment data to drive subsequent conferences and small group work. Each conference or small group lesson focuses on a particular reading strategy to learn more about individual student reading needs within the small group setting.

Reading Strategy Groups

Teachers may gather strategy groups when students at various levels need support with a specific skill. For example, teachers may gather a group of students based on similar noticings on formative assessments. Students will practice working on a targeted skill with scaffolded supports as needed.

Close Reading

Close reading is a rereading of a short passage looking at specific details to deepen comprehension. It promotes higher order thinking in relation to the text by determining importance and analyzing select passages and excerpts.

Writing Workshop

What is Writing Workshop?

The writing workshop framework is used for writing instruction. This is the daily block of time devoted to teaching students to become skilled writers. Each Writing Workshop lesson begins with explicit instruction in a curriculum driven minilesson that is grounded in a clear teaching point. After the minilesson, individual writing conferences take place while the majority of the students are writing independently. This structure allows teachers to truly get to know each child as an author, and then to provide ongoing support for each child's writing.

Minilesson

Writing workshop begins with a minilesson, a short whole class lesson in which the teacher teaches students something about writing (Anderson 2005). The majority of the class time is spent with students practicing the skill and strategy work that was introduced during minilessons, small group work, and/or shared writing. The teacher gradually releases responsibility to students with strategic levels of support.

Writing Conferences

While students write, teachers move around the classroom conducting writing conferences. In these one-on-one conversations, teachers teach each student about an aspect of writing that meets that students' needs as a writer (Anderson 2005). According to Lucy Calkins, a writing conference should contain the following parts:

1. Research: Observe and note something to praise and something to grow.
2. Decide: Determine the teaching point.
3. Teach: Coach a part of the student's writing process.
4. Link: Remind the student to use his/her new skills as an author in future writing endeavors.

Anecdotal records of writing conferences are used to compile all of the useful information collected. The conference notes are an effective tool to help identify trends in each child's writing and assess his/her growth as a writer. Conference notes provide formative assessment data for subsequent individual and small group instruction. (See below for Carl Anderson's example of a writing conference form.)

14 Strategic Writing Conferences: Teacher's Guide

Writing Strategy Groups

Teachers may convene strategy groups when students at various levels need support with a specific writing skill. This is an effective format when a small group of students is struggling with the same writing skill and the teacher can target that particular group.

Independent Writing

This is the time when students practice the skill taught during the mini lesson with their own writing. Students are encouraged to write with independence, focus, and stamina in order to produce writing in volume.

Writing Share

Ultimately, the lesson will close with a culminating group discussion that reviews the teaching point of the lesson while providing an opportunity for students to share their learning and process.

Interactive Writing (K-1)

Interactive writing supports foundational skills for young writers. In this lesson structure, the teacher and students compose a message together and the pen is shared. This type of work supports concepts of print, sound-symbol relationships, increases spelling knowledge, and provides opportunities to plan and construct text in a shared writing setting (Fountas & Pinnell, 2001). Unlike independent writing, where students spell using a developing understanding of sound-symbol relationships (i.e. inventive spelling), interactive writing models correct writing conventions. In other words, if the students do not know a writing convention rule, the teacher delivers it explicitly in the creation of the shared text.

Shared Writing (K-6)

Teachers and students work together to compose written texts that support the current genre/unit of study. This demonstrates how writing works, provides opportunities to model spelling strategies, revision work, and editing strategies. The students are brought through the writing process together. This also provides an exemplar to post in the classroom for reference.

What is the difference between revising and editing?

Revising and editing are not the same part of the writing process. When revising, the author is changing the meaning or way in which the reader perceives, experiences and interprets a piece of writing. This can be accomplished by adding new thoughts, clarifying existing thoughts, choosing more descriptive words, improving overall understanding of ideas presented, enhancing character development, adding more detail, or eliminating unnecessary elements.

When editing, the overall piece remains exactly the same, but the writer fixes the mistakes they have made, such as typos, grammatical errors, and spelling mistakes. This is an ideal point in the unit to teach grammar lessons, as students can apply what they learn to their own pieces of writing.

Word Study

Oradell Public School District utilizes an integrated approach to word study. Although word study is embedded in the various reading and writing workshop lessons, time is reserved for word study activities and assessments during the literacy block. Word study time begins in Kindergarten with early literacy concepts, phonics/word work, and handwriting activities and evolves toward work in spelling, grammar, and vocabulary.

Phonological and Phonemic Awareness for Kindergarten and Grade 1

Heggerty Phonological and Phonemic Awareness

Teachers in grades K-1 use Heggerty to teach phonological and/or phonemic awareness skills daily including Rhyme, Phoneme Isolation, Blending, Segmenting, and Manipulation. Students will also practice 2-3 early literacy skills, including building alphabet knowledge, language awareness, and phoneme-grapheme connections. Teachers implement Heggerty as an oral and auditory warm-up to

phonics instruction. Explicit phonemic awareness instruction provides a foundation for students to anchor their reading and writing skills during phonics instruction.

Phonics Resource for Primary Grades

Oradell Public School is implementing the Wilson Foundations program in our K-3 classrooms. Teachers will use the Foundations materials during their literacy block to build students' phonics/vocabulary skills. Through Foundations, emerging readers review letters, their sounds, and how to form them, along with strategies for segmenting and blending words as they try to read and spell them. They also learn about many aspects of word and sentence structure. Echo, an owl puppet children love, encourages them as they learn through repetition, build sounds and words with magnet letters, and engage in other visual, auditory, oral, and kinesthetic activities that foster literacy.

Word Study in the Upper Grades

Students in grades 4-6 engage in multiple ways into a deeper study of vocabulary. Word study provides students with opportunities to investigate and understand the patterns in words. Knowledge of these patterns means that students needn't learn to spell one word at a time. Word study is also designed to build word knowledge that can be applied to both reading and spelling. Students learn Tier 2 and Tier 3 words through read alouds and have opportunities to engage in authentic practice with the words to gain a deeper understanding and application in their writing. The more students understand academic vocabulary, the easier it is for them to understand the information they may read or hear about a topic (Marzano 2005).

Grammar

Oradell Public School District believes in an embedded and a blend of an explicit and inquiry-based approach. With this in mind, we incorporated a [grammar skills continuum](#) created by Patty McGee of grammar and mechanics skills that will be taught at each grade level. The continuum suggests mini lessons that include a gradual release model of immersion, focus area, and transfer.

All About the Language Arts Curriculum

How was the curriculum developed?

The Oradell Public School District's curriculum consists of reading and writing units that have been inspired by both the Science of Reading and the work of Jennifer Serravallo and Patty McGee. Please see the "Professional References" section for specific books used. Additionally, writing rubrics for narrative, informational, and opinion writing are provided. The OPS rubrics have been linked to the document as Google Docs for ease of use; teachers can make a copy and revise for specific units as needed. Teachers are encouraged to collaborate to create additional minilessons and formative assessments for the whole group, small-group, and individual conferences.

Each unit contains modules with corresponding WALT statements (We are learning to/that) that serve as teaching points or learning objectives. A module is the section of each unit that groups particular teaching points. A WALT statement addresses both the skill and strategy that will be practiced in a given reading or writing block followed with a "by" which indicates how the objective is to be met. The WALT statements in the curriculum are directly connected to the standards. There are often a variety of ways to achieve the

WALT statement which is meant as a menu of options and are chosen based on assessment and student data.

Modifications

The modifications section at the end of each bend is meant to help guide the differentiation of the units for students with IEPs, English Language Learners, Tier 2 At-Risk students (students in Basic Skills) and Gifted and Talented students. Carol Ann Tomlinson defines differentiation as tailoring instruction to meet individual needs. Whether teachers differentiate content, process, products, or the learning environment, the use of ongoing assessment and flexible grouping makes this a successful approach to instruction. At its most basic level, differentiation consists of the efforts of teachers to respond to variance among learners in the classroom. Whenever a teacher reaches out to an individual or small group to vary his or her teaching in order to create the best learning experience possible, that teacher is differentiating instruction (Tomlinson 2000).

Teachers can differentiate at least four classroom elements based on student readiness, interest, or learning profile:

1. Content: what the student needs to learn or how the student will get access to the information
2. Process: activities in which the student engages in order to make sense of or master the content
3. Products: culminating projects that ask the student to rehearse, apply, and extend what he or she has learned in a unit
4. Learning environment: the way the classroom works and feels

Sixth Grade Reading Curriculum

Unit 1: Reflecting on Themselves as Readers

Unit Overview

In the *Reflecting on Themselves as Readers* unit, students will establish their reading identities and build a community of readers. They will choose independent fiction novels that are appropriate for their interest, level, and understanding. Students will think about who they are as readers and use that knowledge to establish self-regulated reading goals. They will review ways to monitor their reading and respond to it in writing. Students will build a community of readers by sharing and discussing their goals with their classmates. They will create reading partners and use accountable talk to foster lively conversations about texts. Students will also prepare to respond to texts by writing response letters about their reading. Students will start reading, *Fish in a Tree*, as a class mentor text to start to build a community and discuss the importance of a growth mindset.

Enduring Understandings

Readers will:

- Build a community of readers that have the ability to discuss, analyze, and interpret texts.
- Think about who they are as a reader and what they would like to accomplish as a sixth grader.
- Establish self-regulated goals that will push their thinking about texts and who they are as an older reader.
- Review ways to monitor their reading.
- Think about before, during, and after reading to support comprehension.
- Discuss their findings with others.
- Write a response letter to extend their thinking.
- Identify the main idea of a poem.
- Identify and understand poetic terms.
- Analyze how a particular line or stanza is central to the meaning of the text.
- Make connections to poems and themselves.
- Demonstrate their understanding of poetry by experimenting with their own poetry.

Unit 2 Fiction: Character Analysis and Literary Elements in Short Stories

Unit Overview

In the *Character Analysis and Literary Elements in Short Stories* unit, students will read a variety of short stories to develop theories about characters. Students will learn about different types of characters and deepen their understanding about a character's motivations, goals, struggles, and desires. They will make inferences by observing a character's speech, thoughts, effects on others, actions and looks in order to build theories about that character. Students will track and analyze motifs within a story. They will also explore the struggles that characters face in order to develop a recurring theme. Students will define and identify literary elements within the story to deepen their understanding of a text. They will think about the perspective and point of view of a story and how they influence the way the story is told. Readers will explore the impact of flashback and foreshadowing on a story. They will examine the parts of the plot and identify them across short stories. Students will refer to their mentor text, *Fish in a Tree*, to look for examples of characters and literary elements. Students will continue to reflect upon and establish goals. The next class read-aloud, *Crash* by Jerry Spinelli, should be started during this unit immediately after the completion of *Fish in a Tree*.

Unit 3 Fiction: Comparing Themes in Literature

Unit Overview:

In the *Comparing Themes in Literature* unit, students will use all of their knowledge of the literary elements and characters to start identifying themes in stories. Readers will think about the conflict, reactions, and resolutions of characters in order to identify the messages in stories. Students will track characters and the ways in which they are changing to think deeply about the text. They will think about what the text is mostly about and use textual evidence to support their thinking. They will think about the themes discussed in *Fish in a Tree* and *Crash*, and use these to compare themes from the independent narratives they have read. Students will think about the universal messages they have encountered in short stories and independent novels. They will create a list of common themes in literature by thinking about the types of lessons that should exist. They will track trends across stories determining themes and exploring evidence-based similarities and differences.

Enduring Understandings

Readers will...

- Read a variety of narratives that involve drama and conflict.
- Cite textual evidence when discussing the characters and structure of the text.
- Think about the character's conflict, reactions, and resolutions to identify the theme.
- Synthesize meaning across the text as they read.
- Compare and contrast the ways in which storylines are developed.
- Compare and contrast themes and how characters contributed to those themes.
- Look for motifs, or recurring ideas, concepts, and characters to better understand theme.
- Think about and identify the author's message or purpose for writing the poem.
- Identify the mood or tone of poems by examining the word choice.

Assessments

Possible Ongoing Assessments

- OPS Assessment for Independent Reading Levels
- Take a custom LinkIt! assessments.
- Create boxes and bullets of themes.
- Take unit quizzes.
- List common themes found in literature.
- Use partner talk.
- Write short stories that contain strong themes.

- Compare and contrast themes in a t-chart.
- Chart the conflict, reaction, and resolution.
- Think about how the character is changing.
- Stop and jot theories about the theme.
- Stopping and jotting about the main idea

Unit 4 Nonfiction: Tapping into the Power of Nonfiction

Unit Overview

In the *Tapping into the Power of Nonfiction* reading unit, students will read nonfiction texts to delve deeply into the genre. Students will develop their own ideas, generate questions to contribute to small group discussions, and deepen their understanding of the intricacies of informational texts. They will use knowledge of text structures and text features to strengthen their understanding of nonfiction. Students will synthesize information on the same topics across texts. By doing so, they will become masters on a variety of nonfiction topics. Class texts will include: **The African American Experience**, Important Women, **The Holocaust**, **The Asian American Experience**, the impact of climate change, and the Industrial Revolution. They will learn strategies to discern the author's perspective and point of view. Students will work in research groups to study nonfiction topics. Students research topics by previewing texts to notice repeating subtopics, critical vocabulary and concepts. Readers will recognize that nonfiction texts come in many different forms: in print, online and as video. Students will incorporate ideas from numerous texts with what they already know. They will use critical thinking and problem-solving strategies when encountering information that seems unfair or unjust. Students will learn how to use trustworthy online resources as tools to support their research. They might study online articles, interactive text features, and videos. Students will ultimately learn ways to sustain their nonfiction reading lives even when transitioning into a new reading unit.

Unit 5 Standardized Test Prep: Reading, Thinking, and Writing About Complex Texts

Unit Overview

In the *Reading, Thinking, and Writing About Complex Texts* unit, students will review all of the skills they have learned when reading both literary and informational texts. Students will pull on all they have learned during reading and writing workshop lessons throughout the year and apply them to the test-taking genre. They will continue to answer literal and inferential comprehension questions. They will review narrative and non-narrative techniques through a testing-taking lens. Students will learn how to carefully read and unpack a prompt in order to successfully respond to the text within a limited time frame. They will support their thinking by using textual evidence. Students will use reading, writing, and vocabulary comprehension strategies to help them efficiently read and answer questions in order to produce a written response in the appropriate genre.

Enduring Understandings

Readers will:

- Cite textual evidence to support inferences.
- Determine the central idea of nonfiction text.
- Determine word meanings and connotations within context.
- Determine an author’s point of view and recognize biased text.
- Compare evidence from various sources of text.
- Analyze informational text to gather and synthesize information.
- Present claims and findings grounded in evidence from the text.
- Create digital public service announcements on different topics.
- Engage effectively in a range of collaborative discussions.
- Write effective research simulation, literary analysis and narrative tasks.
- Compare and contrast poems with similar issues or main ideas.

Unit 6 Fiction: Analyzing Social Issues Through Book Clubs

Unit Overview

In the *Analyzing Social Issues Through Book Clubs* reading unit, readers will divide into book clubs and select books based on their interest, reading level, and collaboration. Students will build on their knowledge of social issues and read and discuss books containing a variety of themes. The term “social issues” refers to issues that affect groups of people such as poverty, homelessness, joblessness, bullying, racism, and bias against the elderly. Students will develop ways to manage their book clubs and take notes to prepare for discussions. They will debate and use textual evidence to support their claims. Readers will identify the issues that characters are facing in the book, and they will use their knowledge of these issues and empathize with the characters. Students will think deeply about how power, relationships, and perspective influence theme. They will notice how characters are starting to change and what that might teach them about the message. Students will make connections to the characters and learn from the texts.

At this point in the year, students have built a solid foundation for the reading work to come as they move to middle school. They have been reading with high volume and engagement and they have studied the nuances of characters across books. Now is the time to give them a practical introduction to critical literacy. In this case, they will be focusing on reading to identify and study the social issues that are woven into the fabric of middle grade and young adult fiction, to consider how power, perspective, and stereotyping help to shape narratives’ themes, and to learn how reading across genres can also help to develop a more researched view of an issue in society.

Enduring Understandings

Readers will:

- Establish book club routines and collaboration.
- Define social issues, problems, power, unfairness, power relationship, pressure, and perspective.
- Use their understanding of the issues to develop empathy for the likable and less admirable characters.
- Compare and contrast power dynamics over time to observe change.
- Think about the relationships that exist in characters’ lives.
- Assemble relevant textual evidence, weighing the strength and validity of each to formulate a claim.
- Cite textual evidence to support literal and inferential interpretation of the text.
- Determine a theme of a text and explain how it is conveyed.
- Employ active reading strategies to track and develop interpretation across a text.
- Employ a critical reading lens to focus reading and deepen interpretation.
- Engage in group discussion to build and debate ideas.

Assessments

Possible Ongoing Assessments

- Book club calendars to manage book clubs

- Retelling (characters, setting, plot, problem/solution)

- Pull a Post-it and write long
- Ask and answer questions
- Elaborate on characters and traits
- Make inferences and predictions
