

OPS would like to help bring awareness for Progeria. My name is Tess Tauchert and Ms. Bozios agreed for us to participate in Hats ON for Progeria.

Progeria is a genetic disorder that occurs once in about every 4 to 8 million people. Children with Progeria usually do not live past 15.

I hope that everyone will wear a hat to school on April 19th and bring in some spare change. We will take all the proceeds and donate them to The Progeria Project. I also have a website you can visit to donate.

Thank you for helping OPS help children with Progeria.
