October 23, 2019

October 30, 2019

Note: This will be the only session offered this year.

REGISTRATION:

- **Please email your reply to Ms. Schaum at:**
schaumt@oradellschool.org

Your email MUST be received no later than:

- **WEDNESDAY, SEPTEMBER 18, 2019**

Include your child's name and the name of their teacher. Enrollment is limited to 12 families and final selection will be made by lottery. Returning families will be considered after first time applicants.

WHAT IS FAMILY SCIENCE?

Family Science is an after school program that fosters curiosity about science and encourages parents, teachers and children to explore science together.

Family Science activities are open-ended and extend the OS science curriculum by including math-based physical science, chemistry & biology. Children learn that the essence of science is curiosity, inventiveness, critical thinking and persistence.

Family Science develops children's problem solving skills and helps build a conceptual understanding of science with hands-on materials. Inexpensive materials of all kinds (beans, blocks, bottle caps, water, toothpicks, coins etc.) are used to help children figure out ways to solve problems. Simple materials are also used so that the extension of these activities are easy to do at home!

PLEASE NOTE: Children may not come alone, nor may parents attend without their children! Other school aged family members are welcome, provided they are currently attending OPS.
