

**St. Patrick's Day may be behind us, but don't  
put away all of those green clothes!**

# **OPS is going Green for CP**

**Friday, March 26th**

## **MARCH IS NATIONAL CEREBRAL PALSY AWARENESS MONTH**

**What is Cerebral Palsy?** Cerebral Palsy (CP) affects the way our bodies move. Kids with CP can have a hard time walking, sitting up straight and talking. CP may cause kids to lose their balance easily and sometimes fall. Many children with CP use special shoes, leg braces or wheelchairs to get around. That doesn't mean they can't join in the fun! Kids with CP play sports, make music, paint, play video games want to have fun and make new friends, just like all kids do.

**Why do we wear green?** The color was chosen to represent new growth, as well as hope for new discoveries in treatment and acceptance.
