

Dear Families,

Our Lab is full of designers, engineers, and amazing STEM learners! We are using a variety of materials to create new inventions.

Most of the time we use simple materials to design, build, and test our ideas. We are currently looking for items that you may already have at home.

We hope that you will support our learning by donating some household items. Your recyclables can be used for lots of projects in our classroom.

The items below are currently needed:

Cardboard and cereal boxes - small and medium sized

Paper towels and toilet paper rolls

Clean plastic bottles

Clean plastic containers - any size

Bubble Wrap and packing materials

Fabric Scraps

Small Wood Scraps

Scrapbook Paper

Small Broken toys that can be disassembled for parts

Paper and plastic plates and bowls

Small handheld tools - hammers, screwdrivers, pliers, etc

Small electric tools - drills, screwdrivers, sanders, etc

Nails, screws and bolts

Thank you in advance for your help,

Mrs. Cataldo
